What the heck is the NAB worried about? If the NAB were so worried about my traffic conditions, and weather, seems to me I would be hearing these reports more than 4 times an hour on the radio station I used to listen to. I subscribe to XM because I have a choice in what I want to listen to...and if XM wants to provide me with additional information that could affect my life...than so be it. After all I am paying for this service, and would not expect any less. Why is the NAB not pushing for XM to play more commercials??
How soon before the NAB closes down the weather Channel too!
I think the NAB should concentrate on what they do best....which ironically is the reason why I subscribe to XM in the first place.
Freedom is not another word for greed.
Thanks for hearing me
greg
